PROFESSIONAL SUMMARY

Software Engineer with experience delivering Full-Stack, Cloud-deployed applications, with a focus on integrating AI and LLMs into production systems. Masters in Advanced Computer Science from the University of Leicester, UK, paired with a Bachelors in Computer Science and industry experience across internal tooling and AI-driven products. AWS Certified Cloud Practitioner with experience deploying and scaling systems alongside relational and NoSQL databases and a track record of shipping reliable software end to end, from user-facing interfaces to backend systems.

EXPERIENCE

OffSeason

March 2024 – December 2025

Software Engineer

Leicester, United Kingdom

- Engineered an AI-powered WhatsApp assistant using OpenAI models and the Model Context Protocol (MCP), letting the team query live sales, inventory, and order data across multiple Supabase databases in plain English.
- Built and maintained a full-stack e-commerce platform using Next.js, TypeScript, and Stripe, delivering the full customer journey from browsing and flash sales to secure checkout and order tracking.
- Developed Tracy, an in-house point-of-sale and inventory system serving two retail stores, with barcode checkout, Typesense-powered search, multi-payment processing, and four UK VAT schemes.
- Automated order confirmations, payment-failure alerts, and customer emails using Trigger.dev, n8n, and Resend, and built an OpenAI-powered service that converts production errors into detailed GitHub issues.

Qburst Technologies

July 2023 – December 2023

Software Engineer

Kerala, India

- Developed a full-stack content management system for internal teams using React, Node.js, and PostgreSQL, providing an intuitive interface and REST APIs to create, organize, and publish content efficiently.
- Built a social media platform enabling users to share images, like, comment, follow, and interact, with relational data in AWS RDS, chat messages in DynamoDB, and media served through S3 and CloudFront.
- Deployed and scaled both applications on AWS using EC2, RDS, and load balancing, with PM2 for process management and monitoring to ensure high availability and reliable performance.

EDUCATION

Master of Science in Advanced Computer Science

University of Leicester

January 2024 - July 2025

Leicester, United Kingdom

Bachelor of Technology in Computer Science and Engineering

APJ Abdul Kalam Technological University

July 2019 - June 2023

Kerala, India

PROJECTS

AI-Powered RFP Management System | TypeScript, LLM, React, Node.js, PostgreSQL, Docker, RabbitMQ, Redis

[Github](#)

- Built a full-stack procurement platform where an LLM converts requests into structured RFPs, extracts vendor pricing from emails, and scores proposals, with RabbitMQ queuing and Redis caching reads.

Expense Tracker with Smart Receipt OCR | .NET 9, React, TypeScript, OCR, Entity Framework, Tesseract.js

[Github](#)

- Implemented a .NET 9 expense tracker on Clean Architecture with a one-way dependency rule, combining client-side Tesseract.js OCR with server-side OCR.space calls to auto-populate receipts, with fallback when OCR fails.

Meeting Scheduler Agent | Python, Gemini API, Gmail API, Google Calendar API, OAuth2

[Github](#)

- Developed a Gmail-and-Calendar scheduling agent using Gemini API that books, cancels, and reschedules meetings, using tentative holds to prevent double-booking and stop LLM time corruption via placeholders.

Penply – Collaborative Study Platform | JavaScript, React, TailwindCSS, Node.js, Express.js, Prisma, Socket.io, AWS S3

[Live](#)

- Created a study platform where students join rooms to chat in real time, share notes and files, and collaborate live, with secure login via Google OAuth and two-factor authentication.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C#, SQL, HTML/CSS

Frontend & Backend: React.js, Next.js, Node.js, Express.js, ASP.NET Core, FastAPI, TailwindCSS

AI & Databases: LLMs, AI Agents, MCP, Claude Code, PostgreSQL, MongoDB, Redis, AWS, MySQL

DevOps & Tools: Docker, Git, CI/CD, RabbitMQ, Odoo, Puppeteer, Linux
