EXPERIENCE

OffSeason

Software Engineer

March 2024 – December 2025

Leicester, United Kingdom

- Built and maintained OFFseason's e-Commerce platform using Next.js, TypeScript, and Stripe, delivering the full customer journey from browsing and flash sales to secure checkout and order tracking.
- Developed Tracy, an in-house point-of-sale and inventory system serving the company's multiple retail stores, with barcode checkout, Typesense-powered search, multi-payment processing, and four UK VAT schemes.
- Engineered an AI-powered WhatsApp assistant enabling the team to query live sales and inventory data in plain English, built using OpenAI models and the Model Context Protocol (MCP) to connect to company databases.
- Automated core workflows including order confirmations, payment-failure alerts, and customer emails using Trigger.dev and Resend, and built an OpenAI-powered service that turns production errors into detailed GitHub issues.
- Created a suite of web-scraping and data-pipeline services with Puppeteer and Bun to collect product and pricing data from external sources, storing it in database through scheduled background jobs.

Qburst Technologies

Software Engineer

July 2023 – December 2023

Kerala, India

- Developed a Full-Stack content management system for internal teams using React, Node.js, and PostgreSQL, providing an intuitive interface and REST APIs to create, organize, and publish content efficiently.
- Built a social media platform enabling users to share images, like, comment, follow, and interact, with relational data in AWS RDS, chat messages in DynamoDB, and media served through S3 and CloudFront.
- Implemented real-time chat and notifications using Socket.io, with RabbitMQ handling message queues and Redis providing caching to keep interactions fast and reliable as usage grew.
- Deployed and scaled both applications on AWS using EC2, RDS, and load balancing, with PM2 for process management and monitoring to ensure high availability and reliable performance.

EDUCATION

Master of Science in Advanced Computer Science

University of Leicester

January 2024 - July 2025

Leicester, United Kingdom

Bachelor of Technology in Computer Science and Engineering

APJ Abdul Kalam Technological University

July 2019 - June 2023

Kerala, India

CERTIFICATIONS

AWS Certified Cloud Practitioner

Amazon Web Services (AWS)

Issued: September 2024

PROJECTS

Property Transaction Extraction System | Next.js, TypeScript, Express, PostgreSQL, Drizzle ORM, Redis, BullMQ

[Github](#)

- Designed an async pipeline that extracts, translates, and structures property transaction data from Tamil-language legal PDFs using a rate-limited BullMQ worker with page-level batching, progress streaming, and a PostgreSQL schema.

AI-Powered RFP Management System | TypeScript, LLM, React, Node.js, Express, PostgreSQL, OpenAI, Docker, RabbitMQ, Redis

[Github](#)

- Built a full-stack procurement platform where an LLM converts plain-English requests into structured RFPs, extracts vendor pricing from reply emails, and scores proposals, with RabbitMQ queuing emails and Redis caching RFP reads.

Expense Tracker with Smart Receipt OCR | .NET 9, React, TypeScript, OCR, Entity Framework, Tesseract.js

[Github](#)

- Implemented a .NET 9 expense tracker on Clean Architecture with a one-way dependency rule, combining client-side Tesseract.js OCR with a server-side OCR.space API call to auto-populate receipts, with a manual-entry fallback when OCR fails.

Penply | JavaScript, React, TailwindCSS, Node.js, Express.js, Prisma, Socket.io, AWS S3

[Live](#)

- Created a collaborative study platform with room-scoped real-time chat over Socket.io, a Prisma/PostgreSQL data layer, BullMQ background jobs, S3-backed file uploads, and JWT authentication with Google OAuth and two-factor login support.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C, C#, SQL, HTML/CSS

Frontend : React.js, Next.js, TailwindCSS, Framer Motion, Zustand, Shadcn/UI, Redux

Backend : Node.js, Express.js, ASP.NET Core, FastAPI, Hono, Bun, Socket.io

AI & Machine Learning: LLMs, AI Agents, Model Context Protocol (MCP), NLP, TensorFlow, PyTorch, Scikit-learn, DeBERTa, CNNs

Databases & Cloud: PostgreSQL, MySQL, Supabase, MongoDB, Redis, AWS (S3, EC2, CloudFront), Drizzle ORM, Prisma

DevOps & Automation: Docker, Git, CI/CD, RabbitMQ, BullMQ, N8N Workflow Automation, Jest, Vitest, PM2, Puppeteer, Linux
